SECURITY ENGINEER - PENTEST (M/W/D)

Vienna, Graz, Klagenfurt, Karlsruhe, Remote | full time

You have high analytical, communicative, and creative skills and work both independently and in a team. You are someone who easily identifies “weaknesses” and enjoys working with system responsible persons to close them, thinking like an 'attacker'."

#PROFILE

As a Security Engineer Pentest in our service delivery team, you combine different roles. Depending on the project and situation, you will perform Red Team or Yellow Team tasks as defined by the Build-Attack-Defend pyramid. You are familiar with current threats, weaknesses and exploits and are able to assess their risks and impact. You use your expertise to identify and evaluate weaknesses and support mitigating them. You are responsible for the planning and execution of penetration tests within customer projects to ensure quality assurance, utilizing both standard and custom-made tools while having a significant degree of freedom in designing and customizing. Working closely with system operators, you are also part of the continuous improvement of protection mechanisms and processes at the enterprise level."

#WANTED

- Completed IT education (HTL, university, FH)
- Several years of experience in Cyber Security and as a penetration tester (or as a Red Team Member);
- Knowledge in handling popular Security Scanners and relevant tools;
- Profound knowledge about attack methods and techniques as a White-Hat
- Excellent understanding of complex technical processes and relationships
- Systematic and solution-oriented, independent work
- Excellent German and good English skills
