anexia

+ BE YOURSELF – BECAUSE THAT'S HOW WE WANT YOU TO +

At Anexia, we take responsibility for all the **challenges of the digital world** – each and every day. That's because we see ourselves as the **"Digital Transformation Engine".** And how do we succeed in this mission? It's simple. We are a family of facilitators with innovative ideas. We're capable of, want to, and allowed to make things happen. That's what makes us so unique! Do you want to be a part of our digital revolution and make history with us? **#joinourrevolution**

TEAM LEAD - VIRTUALIZATION PLATFORM ENGINEERING (M/W/D)

Wien, Graz, Klagenfurt, Karlsruhe, Remote | full time

You're passionate about complex technical systems, interconnected infrastructures, and modern cloud technologies? You think in end-to-end solutions and bring a high level of technical excellence to the table? You empower your team to deliver at their best, think ahead, and proactively remove roadblocks before they arise? Then help us shape the future of our cloud services – with creative freedom and exciting technical challenges.

#PROFILE

Disciplinary and technical leadership of a team of X engineers in the virtualization domain

- Responsibility for the development and operation of cloud services, as well as for overcoming operational and technical challenges within the team

- Translation of customer feedback into actionable work packages and ensuring their successful implementation

- Supporting the team through active listening and early identification of potential issues

- Development and establishment of technical standards to help the team focus on service quality

- Full ownership of the quality, performance, and continuous improvement of our services

- Creation of pragmatic solutions to ensure long-term stability and maintainability

- Crisis management and solution-oriented action in high-pressure situations

- Simultaneous coordination of multiple complex topics and providing creative impulses to the team

---

#WANTED

—

- Completed technical education or degree in IT or a related field

- Strong expertise in designing, developing, and operating complex software applications on infrastructure level

- Proven experience in both technical and organizational leadership of engineering teams

- Excellent understanding of at least two programming languages in our software stack: Go, Python, PHP, and Java

- Deep knowledge of GNU/Linux as an application platform at infrastructure level

- In-depth understanding of infrastructure technologies (e.g., virtualization, containers, DNS, DHCP, etc.)

- Solid understanding of the interaction between networks, operating systems, and applications

- Systems thinking with awareness of dependencies and interrelations in complex system landscapes

- Strong problem-solving skills and a hands-on mentality

- Practical experience with automation frameworks such as Ansible is a plus

- Sound knowledge of CI/CD pipeline design and maintenance, including software testing and deployment logic

---

#REWARD
—

Anexia grew up as a family, and with our growth strategy, we intend to keep it that way. We like to take responsibility, respect one another, and we know that we can achieve whatever we put our minds to. We look after Anexia, and Anexia looks after us. Enthusiasm, experience, and competence count, so you can expect a fair salary and numerous benefits.

salary range

min. 60.000€

Our benefits

We are more than just a workplace. Therefore, we offer our employees many benefits (which partly depend on your position and location): good transport connections and flexible working hours. Period. Not to mention further training, a mentoring program, free parking, a mobile phone and notebook, snacks and drinks, company cars, employee events, a fun corner, ...
